The Araby School is a rectangular shaped 1 1/2 story, gable roofed, common bond building, which faces north from the south side of Araby Church Road. It is a private single ownership residence which is unrelated to any other building.

The principle facade is 3 bays wide, the main entrance door which is a four panel door with original cast iron door step and lintel and originally was located on the east side of the building, occupies the second bay. Two replaced 1/1 windows encased in storm windows with original plain trim and lintels are located in the first and third bays. A front entrance porch extends over the front door. A shed dormer with twin windows is located over the second bay. The roof cornice is boxed with a tin roof. Two single brick chimneys straddle the gable on the east and west ends. The east chimney is original, the west is also of recent construction. A frame belfry tower once straddled the east gable.

The west side of the building is two bays wide with modern 1/1 windows with original lintels and trim occupying both bays. Two small modern 1/1 windows occupy the west gable. Brick replacement and repainting has been done around all window openings. The south side of the building is 3 bays wide with large modern 1/1 windows located in the first and third bays and a small 1/1 window in the second bay.

The east side of the building which was originally the main entrance is two bays wide with the original four panel door and cast iron door step covered by a modern storm door occupying the first bay. A 6/1 window with original trim and lintel covered by storm windows is located in the second bay. It traded positions with the door now occupying the second bay on the north side. A shed addition which is partly enclosed extends from the southeast side of the building.

Two modern 2/2 windows occupy the east gable on either side of a stone which reads Public School No. 1 E. Dist. No. 8 1888.

Iron bracing stars are located above the first level in each corner of the building.

An early photograph of the building owned by the current owner indicates that the large window on each side of the building originally had segmental arches and were 6/6.

SPECIFIC DATES 1888 BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The land on which Araby School was constructed was purchased for \$300 from George H. Thompson on June 20, 1888.

According to local sources, the school had an attendance of approximately 30 students in grades 1 thru 7. A spring located at the bottom of the hill behind the school provided drinking water and a pot belly stove heated the school.

The building was modified into a house around 1928 and continues to be a single family dwelling.
